

TUMOR MARKERS AND CANCER ANTIGENS

We can provide a quotation on custom tumor marker programs. Our custom expertise has assisted numerous companies in achieving their project requirements. We welcome inquiries to design a product with unique buffers, concentrations, specific methodologies to determine concentration, unique shelf life requirements, or custom packaging.

Product and Service Offerings:

- Markers derived from human fluids, human organs or cell culture.
- Multiple product purity grades to meet your application needs.
- Lot-to-lot consistency and product reproducibility.
- Large lot availability.
- Custom products and custom program design experience.
- Technical expertise to support your project requirements.

Antigen Product Offering	
Alpha Fetoprotein (AFP)	Native and Cell Culture
CA 15-3	Native and Cell Culture
CA 19-9	Native and Cell Culture
CA 125	Native and Cell Culture
CA 50	Cell Culture
CA 72-4	Native
Carcinoembryonic Antigen (CEA)	Native and Cell Culture
Cytokeratin 19 Fragment (Cyfra-21-1)	Cell Culture
Prostatic Acid Phosphatase (PAP)	Native
Prostate Specific Antigen (PSA)	Native

*Monoclonal and Polyclonal antibodies may also be available.

Our technical staff is available to assist you in comparing different products. Choose among the different product grades offered or schedule production of a large reserve.

Multiple Purity Grades to Meet Your Specific Application Requirements:

Purity	Definition
Antigen Grade	Immunogen grade product containing less than 25% of other tumor markers (CA-125, CA-19-9, CA15-3). Typically contains trace levels of human serum proteins.
Calibrator Low Cross Reactivity (LCR) Grade	Contains less than 25% of other tumor markers like the above "Antigen Grade" product except that this product does contain human serum proteins.
Calibrator Grade	Same as the above "Calibrator LCR Grade", except this product is not tested for the levels of other tumor markers.

For specifications, bulk pricing, large lot availability, or samples, contact us.

Quality and Commitment:

- FDA registered facility
- QSR, Quality System Regulation Documentation
- Committed to total customer satisfaction

For Research or Further Manufacturing Use Only. Not for Use in Diagnostic Procedures.
